MMG DISK COMMANDER II

No more going to DOS to remember what was on each disk! No more long lists of what games are where! Start any BASIC or machine language program by typing a single number! MMG DISK COMMANDER II is here! MMG DISK COMMANDER II consists of two programs, an AUTORUN.SYS and the DISKCOMM file, which can be transferred to each of your disks. Then, when you boot up your ATARI with any of these disks, your TV or monitor screen will introduce MMG DISK COMMANDER II, accompanied by a fanfare of trumpets. This introduction can be customized to your own family easily, and specific instructions are included to help in this customization. MMG DISK COMMANDER II will then tell you how much room you have left on that disk, and allow you to run any of them by simply typing a single number. This program is ideal for new computer owners, or for those who have small children who will be using the computer for education or games. It will load BASIC or machine language programs and RUN them, and if you attempt to RUN a nonexecutable file, extensive error trapping will prevent system crashes. Further customization is described in the manual, which will allow even novices to create a highly individualized version of MMG DISK COMMANDER II. MMG DISK COMMANDER II requires 16K of RAM and one disk drive. For ATARI only. **Suggested retail price—$29.95.**

MMG ACCOUNTS PAYABLE

The MMG ACCOUNTS PAYABLE is a totally menu driven, easy to use series of programs tailored to the general needs of the small business person. This package, which can be customized to your own personal requirements, is an invaluable aid in monitoring your accounts payable and cash flow requirements.

This program can be used with any parallel printer and can support up to four disk drives. Design your own print formats or use the formats on the disk. Since the source code is available, customizing the programs for additional files or disk drives can be accomplished by those familiar with programming.

The MMG ACCOUNTS PAYABLE package generates all standard accounts payable reports including: Invoice Register, Cash Requirement Report, Vendor Analysis Report, Check Register Report, Alphabetical or Numerical Vendor Listings; and prints checks.

The MMG ACCOUNTS PAYABLE package handles up to 350 invoices and 200 vendors, and when used in combination with the MMG GENERAL LEDGER makes up-to-the-minute financial information easily obtainable. In addition it can be interfaced with the MMG FORM LETTER WRITER to generate sales bulletins, notices to vendors, or practically anything!

The use of machine language subroutines increases the speed of this valuable package, while at the same time allows you to change any part of the program to suit your particular requirements.

The MMG ACCOUNTS PAYABLE program requires 40K of RAM, two disk drives, the ATARI BASIC cartridge and any parallel printer. For ATARI only. **Suggested retail price—$99.95.**

MMG MAIL LIST

Need to establish a mailing list of customers, friends, birthdays, anniversaries or Christmas cards?...Your ATARI or COMMODORE is a powerful computer...put it to work, with MMG MAIL LIST. This is by far the fastest, most versatile such program available for the ATARI and COMMODORE. Completely menu driven, MMG MAIL LIST is extremely user friendly. Extensive error trapping prevents loss of information, and the MMG MAIL LIST will accept up to nine different fields. The uses of MMG MAIL LIST are limited only by your imagination! Imagine being able to sort by zip code, by phone area code, by name, and all at machine language speed. Search capability as well; if you remember only a portion of a name, MMG MAIL LIST will find all names beginning with that fragment. Adding records, deleting old records, making alterations in any of your stored information; all functions are supported and extremely easy to learn and use. MMG MAIL LIST will print to your screen or any printer, and any configuration of labels can be used. It will even print directly on envelopes! The best part of MMG MAIL LIST, though, is its speed—as much as 50 times faster than competitive products. No more long waits to find information—it's all right at your fingertips!

The MMG MAIL LIST requires 40K of RAM and one disk drive. For ATARI and COMMODORE. **Suggested retail price—$39.95.**

MMG DATA MANAGER

Do you spend a lot of time searching frantically for things that turn out to have been right in front of you the whole time? If so, then the MMG DATA MANAGER is for you. Organize virtually anything into a computer searchable format, and let your ATARI do the hunting for you. This flexible database manager will allow 10 fields, with machine language sorting and searching on all fields. In addition, you have total control of the structure of your data, allowing you to design a database with which you feel most comfortable. A special feature of MMG DATA MANAGER is its ability to select for a given value of any given field, or any combination of values from many fields. You could, for instance, determine who lived in Las Vegas, Nevada, and bought item 3145 from you, and whose last name began with SM, and whose telephone number began with (702) 87. You'll never lose track of information again. Multiple print options add to the versatility of MMG DATA MANAGER.

MMG DATA MANAGER requires 40K of RAM and one disk drive. For ATARI only. **Suggested retail price—$49.95.**

MMG FORM LETTER WRITER

The product many of you have requested has now arrived. Designed to interface with all the other business packages, the MMG FORM LETTER WRITER will produce a series of customized letters to everyone on your mailing list. A word processor designed specifically for letters, the MMG FORM LETTER WRITER offers full screen editing, saving and recalling letters to and from disk, and a built-in, simple to use interface which allows the sequential printing of letters to each person or firm contained in either the MMG MAIL LIST, MMG DATA MANAGER, MMG ACCOUNTS RECEIVABLE, MMG PAYROLL, MMG ACCOUNTS PAYABLE, or MMG INVENTORY database. Inside addresses and salutations are automatically read from MMG MAIL LIST and inserted in each letter as it is printed. You can simplify your form letter writing enormously!

The MMG FORM LETTER WRITER requires 48K of RAM and one disk drive. For ATARI only. **Suggested retail price — $29.95.**
